潮流导向委员会自 1998 年成立，委员会各成员来自世界各地的时尚之都，遍布欧洲、亚洲及美国等全球主要成衣出口市场，并致力为设计师及纺织业专才提供宝贵的市场研究及推广工具，协助他们紧贴未来的时装潮流而进行设计及生产。每一季，委员会都会结合彼此的专业知识和地区实力，利用展商所提交的面料以鲜明的主题刻划未来潮流及时装材料趋势。

The *Directions* Trend Committee was established in 1998, committee members come from fashion capitals of the major export markets for international garment trade: New York, Milan, Paris and Tokyo, has provided an invaluable research and marketing tool to designers and garment professionals, helping them steer their designs and manufacturing process in line with coming fashion seasons. Each season, they combine their expertise and local influences to come up with the themes that tell the story of tomorrow's apparel fabric trends and present at the Trend Forum through fabrics from exhibitors.

2025 春夏季度主题：起伏跌宕

Spring/Summer 2025 Seasonal theme: TURBULENCE

一个复杂的新世界即将展开。我们在虚拟世界中的活动范围不断扩大，新的情感也随之涌现。在发掘情感和追求身心健康的过程中体现自我放纵和自我表达。

现代和平主义者在恒常的生活和流动的多元对立间徘徊，将陌生与熟悉、几何与有机、自然与人工、简约与奢华相混合，走遍大地追寻一种亲密融合的感觉。他们以非传统的方式导出自由表达。利用热闹和夸张的巡游来抗拒压抑。致力于将他们拥有的、可改造的和可回收的一切回馈地球。

不论是出于生态意识和反对时装过度生产的考虑，或是高度依赖财政资源并受控于社交媒体和有影响力的人物，时尚界必须确定如何满足消费者的要求。

展望未来，时尚界将展现积极和感性的新价值观，面对潜在的起伏，以坚定的信念，引领人们走向更美好的未来。

四大主题：

- 优雅 • 沉浸 • 转换 • 呼唤

A complex new world is about to unfold. Our scope of activities expands within the virtual world and sees new EMOTIONS emerge. Self-indulgence and self-expression are both reflected in emotional investigation and in the quest for physical and mental WELLNESS.

Suspended between the concreteness of everyday life and the fluidity of dualisms and contrasts, mixing the foreign and the familiar, the geometric and the organic, the natural and the artificial, minimalism and extravagance, modern pacifist PIONEERS scour the continents for a sense of togetherness and generosity. They channel free expression through their unconventional perspective. They fight oppression by means of festive and flamboyant parades. They commit to our planet by making do with what they have, what they can reclaim and what they can recycle.

Fashion must ascertain how to handle consumers' requests, either driven by ecological consciousness and the fight against fashion overproduction, or highly dependent on financial resources and in the grip of social media and influencers.

Going forward fashion will embody the new values of POSITIVITY and sensibility, anchored in trust, to face the emergence of potential TURBULENCE, helming the way to a better future.

Four themes will be presented:

- GRACE • IMMERSIVE • SWITCH • VOICES

当前世界百年变局加速演进，国际格局深刻调整，区域自贸、贸易摩擦等因素对国际纺织产业链、供应链布局影响加深。而在向强国目标迈进的过程中，就纺织服装行业来说，短板技术及应用突破，大宗原料稳定安全供给、产业布局稳妥有序等关键问题的优化是纺织产业未来的使命任务。产品的研发与应用，人工智能的前沿技术创新及多技术领域的跨界融合，都会造成一连串的多米诺效应，涌现出新技术、新动能、新成果、新趋势、新业态 ... 伴随着纺织产业边界的不断拓展以及外部经济赋能的不断深入，智能化、数字化将产业供给质量与效率带进了新高度。同时纤维新材料、精益加工设备、生态印染技术等科技创新成果支撑下的新模式、新业态不断呈现。科技创新力是产品的第一生命力，我们该如何用科技创新与技术应用为产业供给质量与效率注入新活力？如何将前沿技术落地为先进生产力，将科技创新与商业价值进行最大转化？将科技战略支撑与市场循环升级打造出产业前瞻性、引领性、原创性应用生态。实现纺织高质量发展的新跨越，在未来发展和国际竞争中赢得战略主动，一同共创智能化、绿色化、高端化的产业未来。

In today's world, where the international landscape is changing on a scale not seen in a century, regional free trade and international trade frictions are on the rise, severely impacting the industrial and supply chains of the global textile industry. To build China's strength in the textile industry, it is important to achieve breakthroughs in weak technologies and applications, ensure a steady and secure supply of bulk raw materials, and maintain a stable and sound industrial layout. The R&D and application of products, the innovations in AI and other cutting-edge technologies, as well as the integration of various technological fields will create a domino effect and bring forth new technologies, new impetus, new achievements, new trends, new formats... With the continuous expansion of boundaries and empowerment of external economy, the textile industry is becoming more intelligent and digitalized, bringing the industrial supply quality and efficiency to new levels. At the same time, new models and business formats are constantly emerging, supported by new fiber materials, lean processing equipment, ecological printing and dyeing technology and other innovative technologies. Scientific and technological innovation is vital to products, but how can it inject new vitality into the textile industry to improve its quality and efficiency? How should cutting-edge technologies be translated into advanced productivity to maximize the commercial value of technical innovation? It is imperative to promote a forward-looking, leading and original industrial ecology through technical strategies and market upgrading, so as to make a giant leap in the development of an intelligent, green and high-end textile industry that maintains the strategic initiative in future development and international competition.
